Description

Join us at **Beaver County Stockyards in Beaver, Oklahoma**, for an upcoming cattle auction featuring livestock offered by local and regional consignors. Buyers can review available lot information, photographs, videos, and consignor notes before the sale. Additional lots and supporting information may be published as they become available, so buyers are encouraged to check back regularly for updates.

Beaver County Stockyards brings together buyers and sellers from Oklahoma, Texas, Kansas, Colorado, and the surrounding region. The auction provides a trusted, transparent marketplace backed by an experienced sale staff and a strong buyer base.

Announcements made by auction staff on sale day will take precedence over information previously published online.

Schedule

- **8:30 AM:** Stockyard and buyer registration opens
- **9:00 AM:** Cattle preview and lot inspection
- **9:45 AM:** Buyer announcements and sale instructions
- **10:00 AM:** Auction begins
- **During the sale:** Lots sell in the published sale order unless otherwise announced
- **After each purchase:** Buyers receive checkout and load-out instructions

Auction Lots

11 lot(s), 502 head

52 Red Angus Cross Feeder Heifers				52	500.0 lb
LOT BCS-SUB-00001				Head	Average Weight
Seller/Ranch: Test Ranch 1				Location: Darrouzett, Texas	
TYPE	SEX/CLASS	FRAME	FLESH	HORNS	IMPLANT
Feeder Heifers	Heifers	Medium	Moderate	Polled	No implants represented
					SLIDE
					\$ 0.15
Breed / Description				Feed / Delivery	
A uniform set of Red Angus and Red Angus-cross feeder heifers with good depth, moderate frame, and an even sort. These cattle are suited for backgrounding, replacement evaluation, or a finishing program.				Feed: Native grass and a balanced grower ration with free-choice mineral.	
				Delivery: Pickup within 7 days of sale	
Health Program				Notes	
Vaccination: Two rounds of respiratory and clostridial vaccines. Weaned more than 45 days, dewormed, and treated for external parasites.				Quiet disposition and accustomed to bunks and waterers. Buyer should confirm final sort and delivery arrangements.	
Age / Source Verified: Single-source, ranch-raised cattle; age represented by consignor.					

Six Black Angus Cow-Calf Pairs				6	1250.0 lb	
LOT BCS-SUB-00001				Head	Average Weight	
Seller/Ranch: Test Ranch 1				Location: Darrouzett, Texas		
TYPE	SEX/CLASS	FRAME	FLESH	HORNS	IMPLANT	SLIDE
Cow-Calf Pairs	Cows with calves	Medium	Moderate	Polled	No implants represented	\$ 0.15
Breed / Description				Feed / Delivery		
A small, uniform group of Black Angus cows with healthy spring-born calves at side. The cows are moderate framed, functional, and in suitable breeding condition. Calves show good vigor and consistent growth.				Feed: Native grass with free-choice mineral and supplemental hay as needed.		
				Delivery: Available after settlement by appointment		
Health Program				Notes		
Vaccination: Cows received an annual respiratory and clostridial program and were treated for internal and external parasites. Calves received age-appropriate vaccinations.				Calves sell at side. Final pregnancy, age, and health information will be announced by auction staff.		
Age / Source Verified: Ranch-raised, single-source group; ages represented by consignor.						

45 Charolais Cross Stocker Steers				45	590.0 lb	
LOT BCS-SUB-00002				Head	Average Weight	
Seller/Ranch: Test Ranch 2				Location: Beaver County, Oklahoma		
TYPE	SEX/CLASS	FRAME	FLESH	HORNS	IMPLANT	SLIDE
Stocker Steers	Steers	Medium-Large	Moderate	Dehorned	No current implant represented	\$ 0.25
Breed / Description Charolais-cross steers selected for growth, length, and feeding performance. The group is reasonably uniform with the bone and capacity expected from Continental-influenced cattle.				Feed / Delivery Feed: Native and improved pasture with a supplemental grower ration. Delivery: August 10 through August 20		
Health Program Vaccination: Complete respiratory and 7-way clostridial vaccination program. Weaned 60 days, dewormed, and poured. Age / Source Verified: Single-source cattle; age and origin represented by consignor.				Notes Feed-ready steers suitable for continued grazing or placement into a finishing program.		

52 Black Angus Weaned Calves				52	475.0 lb	
LOT BCS-SUB-00007				Head	Average Weight	
Seller/Ranch: Ranch name doesn't show				Location: Beaver, Oklahoma		
TYPE	SEX/CLASS	FRAME	FLESH	HORNS	IMPLANT	SLIDE
Weaned Calves	Mixed steers and heifers	Medium	Moderate	Polled	No implants represented	\$ 0.15
Breed / Description				Feed / Delivery		
Black Angus calves from a single ranch source. The group is moderate framed, uniform in kind, and has the condition and health preparation needed for a successful receiving program.				Feed: Bermudagrass hay and a commercial starter ration.		
				Delivery: Available immediately after settlement		
Health Program				Notes		
Vaccination: Two rounds of modified-live respiratory vaccine and 7-way clostridial vaccine. Weaned 45 days, dewormed, and poured.				Calves are bunk-broke, water-trough broke, and handled regularly.		
Age / Source Verified: Home-raised, single-source calves; birth season represented by consignor.						

50 Simmental Angus Feeder Steers LOT BCS-SUB-00013					50 Head	655.0 lb Average Weight
Seller/Ranch: Test Ranch 2			Location: Beaver County, Oklahoma			
TYPE Feeder Steers	SEX/CLASS Steers	FRAME Medium-Large	FLESH Moderate	HORNS Dehorned	IMPLANT Previously implanted; product and date available from consignor	SLIDE \$ 0.15
Breed / Description Simmental-Angus cross steers offering added frame, muscle, and feeding capacity while maintaining Angus influence. The cattle are uniform enough for efficient pen placement.				Feed / Delivery Feed: Native grass with a high-protein supplement. Delivery: Pickup within 5 days of sale		
Health Program Vaccination: Full respiratory and clostridial program. Weaned more than 60 days, dewormed, poured, and acclimated to feed bunks. Age / Source Verified: Single-source cattle; age and source represented by consignor.				Notes Strong feeding cattle suitable for immediate placement in a grow yard or feedyard.		

50 Hereford Cross Replacement Heifers LOT BCS-SUB-00014					50 Head	610.0 lb Average Weight
Seller/Ranch: Test Ranch 2			Location: Beaver County, Oklahoma			
TYPE Replacement Heifers	SEX/CLASS Open heifers	FRAME Medium	FLESH Moderate	HORNS Polled or dehorned	IMPLANT No implants represented	SLIDE \$ 0.15
Breed / Description Hereford-Angus cross heifers selected for soundness, disposition, and maternal type. They are moderate framed and offer a practical base for a commercial replacement program.				Feed / Delivery Feed: Native grass, hay, and a moderate grower ration. Delivery: September 1 through September 10		
Health Program Vaccination: Complete calfhood respiratory and clostridial vaccination program. Dewormed and treated for external parasites. Age / Source Verified: Ranch-raised, single-source heifers; age represented by consignor.				Notes Represented as open. Buyer should rely on sale-day announcements for final reproductive information.		

50 Black Baldy Stocker Calves LOT BCS-SUB-00016					50 Head	430.0 lb Average Weight
Seller/Ranch: Test Ranch 1			Location: Darrouzett, Texas			
TYPE Stocker Calves	SEX/CLASS Mixed steers and heifers	FRAME Medium	FLESH Light-Moderate	HORNS Polled	IMPLANT No implants represented	SLIDE \$ 0.25
Breed / Description Black Baldy calves combining Angus and Hereford genetics. The group is moderate framed, clean made, and sorted for reasonable uniformity in weight and type.				Feed / Delivery Feed: Native grass and free-choice mineral. Delivery: Available within 3 days after sale		
Health Program Vaccination: Initial respiratory and clostridial vaccinations completed. Dewormed and poured prior to consignment. Age / Source Verified: Single-ranch origin; age represented by consignor.				Notes Good compensatory-gain potential for a grass or backgrounding program.		

52 Angus Cross Feeder Heifers LOT BCS-SUB-00017					52 Head	505.0 lb Average Weight
Seller/Ranch: Test Ranch 1				Location: Darrouzett, Texas		
TYPE Feeder Heifers	SEX/CLASS Heifers	FRAME Medium	FLESH Moderate	HORNS Polled	IMPLANT No implants represented	SLIDE \$ 0.15
Breed / Description Angus-cross feeder heifers with a uniform black-hided appearance, moderate frame, and practical feeding condition. The cattle have been sorted for a consistent load.				Feed / Delivery Feed: Pasture, grass hay, and a commercial grower ration. Delivery: August 15 through August 22		
Health Program Vaccination: Two-dose respiratory and clostridial program. Weaned 50 days, dewormed, and poured. Age / Source Verified: Home-raised, single-source cattle; age represented by consignor.				Notes Bunk-broke, quiet cattle suitable for continued backgrounding.		

50 Red Angus Feeder Steers LOT BCS-SUB-00018					50 Head	510.0 lb Average Weight
Seller/Ranch: Test Ranch 1				Location: Darrouzett, Texas		
TYPE Feeder Steers	SEX/CLASS Steers	FRAME Medium	FLESH Moderate	HORNS Polled	IMPLANT No current implant represented	SLIDE \$ 0.30
Breed / Description Red Angus feeder steers with good rib shape, moderate frame, and an even sort. These cattle are prepared for efficient gain in a grazing, backgrounding, or finishing program.				Feed / Delivery Feed: Native grass with a balanced supplemental ration. Delivery: Pickup by appointment within 7 days		
Health Program Vaccination: Complete modified-live respiratory and clostridial program. Weaned 60 days, dewormed, and treated for external parasites. Age / Source Verified: Ranch-raised and single-source; age represented by consignor.				Notes Uniform, feed-ready steers with a calm disposition.		

50 Black Angus Stocker Steers LOT BCS-SUB-00019					50 Head	500.0 lb Average Weight
Seller/Ranch: Test Ranch 1				Location: Darrouzett, Texas		
TYPE Stocker Steers	SEX/CLASS Steers	FRAME Medium	FLESH Moderate	HORNS Polled	IMPLANT No implants represented	SLIDE \$ 0.15
Breed / Description Black Angus stocker steers with moderate frame, good uniformity, and enough condition to transition efficiently into a grazing or backgrounding program.				Feed / Delivery Feed: Native grass, hay, and free-choice mineral. Delivery: Available immediately after sale		
Health Program Vaccination: Respiratory and clostridial vaccines completed. Weaned at least 45 days, dewormed, and poured. Age / Source Verified: Single-source cattle; age represented by consignor.				Notes A practical set of steers for summer grass or a controlled grower ration.		

45 Black Angus Feeder Steers				45	525.0 lb	
LOT BCS-SUB-00020				Head	Average Weight	
Seller/Ranch: Test Ranch 2				Location: Beaver County, Oklahoma		
TYPE	SEX/CLASS	FRAME	FLESH	HORNS	IMPLANT	SLIDE
Feeder Steers	Steers	Medium	Moderate	Dehorned	No implants applied	\$ 0.15
Breed / Description A high-quality, uniform lot of home-raised Black Angus feeder steers with strong genetic backgrounds. These medium-framed cattle have the condition, disposition, and preparation needed for a backgrounding or finishing program.				Feed / Delivery Feed: Native grass with a nutrient-balanced supplemental ration. Delivery: August 20 through September 20		
Health Program Vaccination: Vaccinated with 7-way clostridial and a complete IBR, BVD, PI3, and BRSV respiratory program. Weaned 60 days, preconditioned, dewormed, and poured. Age / Source Verified: Home-raised, single-source lot; age and source represented as verified. Born spring 2025.				Notes Preferred pickup is early morning. Driver should call at least two hours before arrival.
